

COSMIC FROG

Supply Chain Design that Balances Cost, Service, and Risk

Post-COVID uncertainty demands a new level of supply chain design technology. Welcome to Cosmic Frog—100% SaaS-based and the only design platform that balances cost, service, and risk for more resilient supply chains amid volatility.

3-in-1 Design Platform

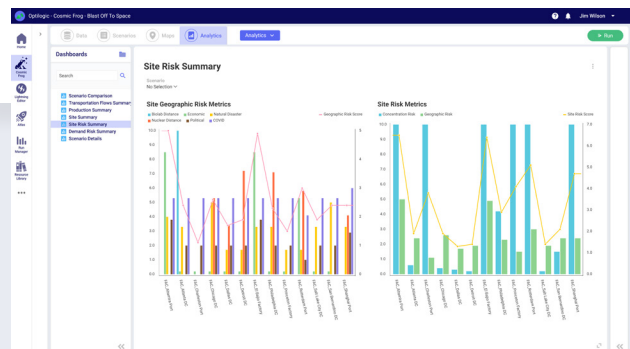

Cosmic Frog is the only supply chain design solution that offers optimization, simulation, and risk analysis across an end-to-end supply chain in a single platform, equipping businesses to make more informed decisions beyond just cost.

Risk Rating for Every Scenario

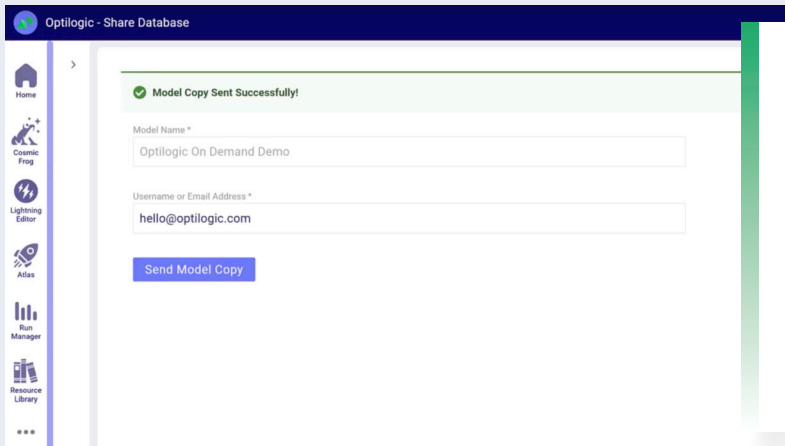

Cosmic Frog provides a risk rating on every scenario, making it easy to consider risk in the strategic decision making process. Now you can proactively minimize risk and volatility and be prepared for the next disruption.

Optilogic considers risk throughout the network and breaks it all the way down to the granular level to help guide supply chain decision-making. Use Cosmic Frog’s risk engine to identify and quantify risks at the Supplier, Facility, Customer, and Network levels. These include external risks like natural disaster events and operational risks like percentage of volume that is single sourced. The engine assesses risk according to analytic data collected by sources like the World Bank and the World Health Organization (WHO).

“What happens if this node goes down? What happens if this gets delayed? What if... We can set that framework now — with Optilogic we have the ability to look at scenarios at a granular level.”

- Eric Sobanski, Senior Vice President, PECO Operations

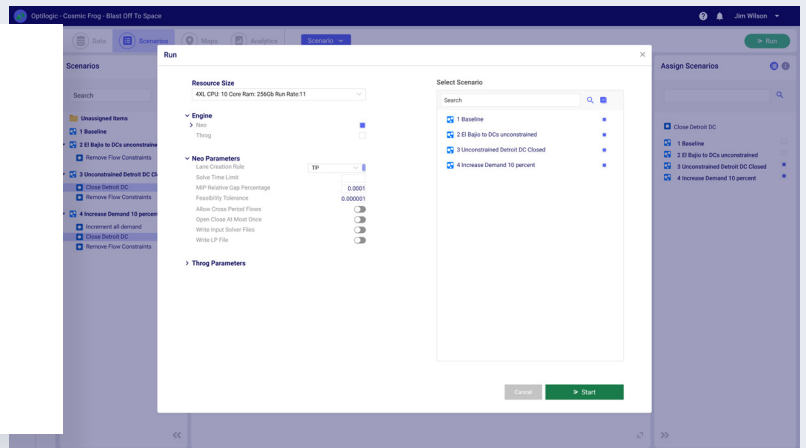

Access from Anywhere and Collaborate with Ease

Whether you need a fresh set of eyes to review your models or you're ready to lead your next stakeholders meeting with confidence, our 100% SaaS-based platform allows you to easily work together on projects and share models enterprise-wide.

Run Hundreds of Scenarios Concurrently, Faster than Ever

Our SaaS platform runs on Microsoft Azure and uses hyperscaling technology to allow hundreds of models and scenarios to run in parallel. We teamed up with Gurobi, the fastest mathematical optimization solver on the market, to help models run even faster.

Answer Your Toughest Supply Chain What-If Questions with Ease

- ✔ Supply chain network design
- ✔ Distribution and logistics
- ✔ Inventory policies
- ✔ Risk management
- ✔ Greenfield analysis
- ✔ CO2 modeling
- ✔ Sourcing and procurement
- ✔ Cost to serve

Get Up and Running in Minutes

3, 2, 1, blast off! We offer professional grade solving technology for optimization, simulation, risk, and advanced analytics – with ZERO installation or lengthy configuration. Create a free account and test drive Cosmic Frog—build a new model from scratch or choose from an array of model templates.

The Most Experienced Team in the Industry

With 185+ years of combined experience in supply chain design, Optilogic boasts the most experienced team in the industry. We're committed to developing your team into design experts with hundreds of helpful training resources and live training events.
